

"Lady Care Systems®"

Overflowing sanitary napkin disposal cans, and the accompanying odor, are common restroom problems.

AMERICARE-NATIONAL's "Lady Care® Fresh Fragrant System" is the hygienic solution. Visitors simply place their used napkins inside the sealed system container and - in an instant - the problem is gone. Your sanitation technician will discard the napkins as part of your restroom maintenance service; he will also clean and disinfect the system with our EPA-approved germicidal cleaner, and recharge it with fragrance.

Ladies love it - plumbers hate it! No more blocked toilets, offensive odors, or fear of spreading blood-borne diseases (AIDS).

Available for a nominal weekly fee.
