

Maintenance Program

After deep cleaning your facilities, AMERICARE-NATIONAL offers an optional weekly maintenance program for a fraction of the deep cleaning cost.

To keep germs from coming back, all restroom toilets and urinals and kitchen and restroom sinks are detail-cleaned and treated with an EPA-approved, hospital-type germicidal disinfectant that kills bacteria for 7-10 days.

Also as part of this weekly service, we will supply and maintain our high-tech air freshening machines in all customer and employee restrooms. With more than 30 aromatic fragrances available from AMERICARE-NATIONAL, your customers will know that you care enough to use the very best in infection and odor control products.
